

“Once again, great work! The deck looks very sharp and the design is awesome. Our client is very happy.

— Marc Charbin, Loderock Advisors

We elevate your presentations to help you sell.

We design sleek, visually impactful, and perfectly-paced decks that tell your story in an enticing and clear way, helping you to attract the right investors.

At Care Creative, presentation design is about more than making your decks pretty. We focus on crafting a unique story — using powerful imagery, bold design, a simplified less-is-more approach to content, and strategic flow that ensures your message gets across in a compelling and accurate way.

We take the time to fully understand your business — to truly know your story and audience — so we can deliver a presentation that you'll be proud to show.

We're not just designers, we're storytellers.

Pricing: Our decks are typically a flat rate of \$3500 for up to 40 slides, and includes high-resolution image sourcing and downloads, and full rights to our working files. We are also happy to work to your budget based on your specific needs.

We're versatile. Our portfolio is chock-full of a wide array of presentations, across a variety of industries and styles.

We're data pros. We take a special interest in data visualization and infographic design.

We're Trusted. We have earned our clients trust in two ways. We often work with highly sensitive information and always keep it safe. And, our clients trust our judgment. They know we understand what they want in a final deliverable.

We make it easy for all your all materials to look cohesive. As a full-service highly experienced design studio, we can design all your supporting materials — both print and digital.

We're kind. And easy going. We produce great work, on-time and on-budget, minus the drama. Always.

We're really good at what we do. We consistently deliver top-quality, attention-grabbing, compliment-inspiring work. You'll see.

Let's do it!
